

FIELD TRIAL DETAILS	
Grower: Hasan Ali Acar	Plantation date: 14.09.2016
District: Belen/ Kumluca / Antalya- TURKEY	1st Application: 21.09.2016
Total Area: 4 da	2th Application: 25.09.2016
Trial Area: 2 da	Harvesting Time: 22.12.2016

Applications

1st Application: 1 week after planting. 100 ml of Bontera mixed with sufficient amount of water enough for one decare.

2nd Application: 4 days after 1st application. Similar dose as earlier application.

Last harvest Date	Control yields in Kg/ 0.2 Ha	Yield in Bontera Treated plants in Kg/ 0.2 Ha	Total yield Increase in kg/ 0.2 Ha	% increase in yield
04/05/2017	1925	2475	550	29

Results

- This was a winter crop under canopy. Under cold (stressed) conditions, Bontera treated plants showed good vegetative growth and root development.
- Bontera treated crop showed 29% increase in yield compared to control crop.
